Travel Required: Up to 50%, some international possible

IMMEDIATE NEED in the Atlanta, GA area for a Senior Systems Engineer who has a minimum of 7 years work experience in the telecom arena and a minimum of 3 years in Universal Mobile Telecommunications System (UMTS) / Long Term Evolution Technology (LTE) Femtocell Radio Design. You experience working as part of a dynamic fast moving, multitasking team will be tested in this position.

The **MUST HAVE** items for this position are:

- Bachelor's degree in Electrical Engineering, Computer Science, or a Related Field
- 7 years work experience in the telecom arena
- Know & understand the challenges of Femto Radio Design
- Tier 3 or 4 knowledge in Universal Mobile Telecommunications System (UMTS) radio design and networking
- Tier 3 or 4 knowledge in Long Term Evolution Technology (LTE) and VoIP
- Strong Technical Sales background
- Proven track record architecting new radio solutions and defining detailed requirements that begin with high-level customer requirements
- Proven track record in negotiating technical specifications with customers and system integration partners
- Tier 3 or 4 knowledge in 3G / 4G
- Experience in 3GPP/WG4 standards work
- Experience conducting technology workshops during pre-sales & trials
- Prior experience in radio design through working for or with Infrastructure suppliers
- Good understanding of VoIP or FMC technologies (as Unlicensed Mobile Access / Generic Access Network or Industrial Wireless Local Area Network (UMA) / (GAN) or (IWLAN)
- Understanding of the Patent process & experience with relevant standards
- Prior experience in & understanding the challenges of a fast growing company

PLUSSES for this position are:

- Master's or a PhD in an applicable field

The **RESPONSIBILITIES** of this position include but are not limited to:

- Extensive customer & partner interaction
- Support Business Development
- Technical Negotiations
- Conduct Technology Workshops during pre-sales & trials
