Our client in eastern Virginia is looking to interview for two open Senior Electrical Designer positions. If you possess the minimum required skills and your experience includes assignments with a steady increase of responsibility, then we are interested in hearing from you. Candidates will work closely with their clients and with members of the internal team to perform the required industrial-level electrical design work involving: power, motor control centers, process / instrumentation flow, and other related aspects of industrial and manufacturing plant electrical design. Travel will generally be confined to local jobsites. Opportunity to work OT is available. No relocation assistance is budgeted at this time.

Minimum requirements:

- At least 7 years of electrical design experience in industrial manufacturing industries
- Demonstrated proficiency in the use of AutoCAD 2008
- Demonstrated expertise in electrical power design, control system design and wiring, panel layouts, and lighting / receptacle layouts
- Solid field experience
- Knowledge of the NEC and safe electrical design
- Ability to execute assignments with a consistent degree of quality
- Ability to handle multiple assignments in parallel
- Exceptional verbal/interpersonal communication skills, with a demonstrated ability to work effectively with clients, peers, and upper management
- U.S. citizen or Green Card holder

Plus:

- Associates or college degree in a related technical / engineering field
