IMMEDIATE NEED in southern California for a Senior Rail Project Manager who will be responsible for full life cycle project from engineering design through construction and commissioning. This will include but will not be limited to business development, client management, engineering and design-team management of large transportation projects.

In the beginning, your major responsibilities will include building the project business in southern California. Ideal candidate should be a seller / doer who has experience in managing heavy rail, light rail, tunnel and highway projects in design and construction management.

You will be highly involved in:

- Project management of rail projects to meet time, cost and quality requirements
- Planning and insuring the requirements of Health and Safety, Quality Assurance, and Environmental Management are implemented and met
- Management of Internal and External supplier relationships
- Review engineering design drawings for consistency with design and construction specifications and constructability

Having or being able to obtain a PE in California within 6 months will be a big plus.

If you meet these requirements and wish to be considered for this position, please send your résumé to us using Word 97 -2003 at [Resumes@PinnaclePlacementGroup.com](mailto:Resumes@PinnaclePlacementGroup.com) or call us at 770-422-2152 or 770-740-0494
